

Hereditary Heart Rhythm Disorders Clinic

The Hereditary Heart Rhythm Disorders Clinic at Ohio State University Medical Center is a consultative service providing comprehensive management, treatment and genetic counseling as well as genetic testing for patients with, or at risk for, inherited cardiac rhythm disorders. Patients are treated by a multidisciplinary team of experts including electrophysiologists and electrophysiology nurses, a medical geneticist, certified genetic counselor and pharmacist.

Patients with a known, or suspected, diagnosis or family history of the following conditions may be referred:

- Long QT syndrome
- Brugada syndrome
- Arrhythmogenic right ventricular dysplasia
- Catecholaminergic polymorphic ventricular tachycardia
- Familial atrial fibrillation
- Short QT syndrome
- Family history of sudden cardiac death

To refer a patient to the Hereditary Heart Rhythm Disorders Clinic, call (888) 293-7677 or fax a referral to (614) 293-7285, ATTN: Genetics. For more information, call (614) 293-6694 to speak with a genetic counselor.
